ATTORNEY GENERAL

STATE OF NEW JERSEY
DEPARTMENT OF LAW AND PUBLIC SAFETY
STATE HOUSE ANNEX
TRENTON, N.J. 08625
609 292-4925

The Honorable Brendan T. Byrne
Governor of the State of New Jersey

Honorable Members of the Senate and
Assembly of the State of New Jersey

Dear Governor and Members of the Legislature:

Pursuant to N.J.S.A. 52:17B-5.5, I am submitting the thirteenth annual report on crime in New Jersey. This information is based on statistics submitted to the New Jersey Uniform Crime Reporting System by every New Jersey law enforcement agency for the year 1979.

This report has been prepared to provide reliable and comprehensive analysis of crime data for the criminal justice community. The graphic and statistical representation of the various crime factors should assist law enforcement administrators in planning programs to combat crime throughout New Jersey.

It would have been impossible to complete this report without the cooperation of New Jersey's municipal, county, state, and other law enforcement agencies, 533 of whom contributed to this effort in 1979. It is with appreciation to these dedicated public servants, and in the interest of more effective law enforcement for all the citizens of New Jersey, that this thirteenth annual Uniform Crime Report is submitted.

Respectfully,

John J. Degnan

JOHN J. DEGNAN
Attorney General of New Jersey

IN MEMORIAM

Members of all Law Enforcement Agencies, and the entire criminal justice community extend their sympathy to the families of the seven New Jersey law enforcement officers killed in the line of duty during 1979.

JOSEPH JOHN RYBKA, JR.
Bergen County Sheriff's Department
Enlisted: September 2, 1969 Died: January 7, 1979

FRANCIS FULLERTON
Moorestown Township Police Department
Enlisted: July 1, 1955 Died: June 1, 1979

JOSEPH ANTHONY POCCHIO
Essex County Police Department
Enlisted: January 3, 1972 Died: August 4, 1979

ALVIN PURCELL WILLIAMS
Woodbridge Township Police Department
Enlisted: December 27, 1958 Died: September 6, 1979

JOHN ANGELO TAMBURRO
Essex County Sheriff's Department
Enlisted: April 13, 1972 Died: October 1, 1979

GEORGE LISETTE AMBROSIO
Trenton City Police Department
Enlisted: January 31, 1972 Died: December 8, 1979

ANTHONY LORDI
Hillside Township Police Department
Enlisted: April 2, 1958 Died: December 14, 1979

SECTION I

SYNOPSIS
UNIFORM CRIME
REPORTING PROGRAM

1979

THE NEW JERSEY UNIFORM CRIME REPORTING SYSTEM

DEFINED

The New Jersey Uniform Crime Reporting System involves the uniform compilation, classification, and analysis of crime statistics reported by all police agencies of the state pursuant to guides and regulations prescribed by law.

The statute which established the Uniform Crime Reporting System (N.J.S.A. 52:17 B-5.1 et seq) empowers the Attorney General to collect, gather, assemble, and collate information which would be of assistance in the proper administation of criminal justice. The Attorney General and the New Jersey State Police (the agency designated by the Attorney General to establish the Uniform Crime Reporting System), in an attempt to achieve uniformity with the F.B.I. reporting system and to establish a broad base for the collection of data involving anti-social behavior, and other relevant information with respect thereto, have defined the word "crime" to include acts which technically within our state are not considered crimes. In this reporting system the word "crime" includes some "disorderly persons offenses." It also includes in a category entitled "all other offenses" violations of municipal ordinances. References to the relevant tables which set forth the Class I and Class II offenses contained in this report clearly indicate what is covered.

PURPOSE

Effective law enforcement requires the coordination of the law enforcement activities within and among political subdivisions. Special attention must often be devoted to a selective and concentrated effort both areawide, as well as in terms of a specific pattern and type of criminal behavior. Selective and coordinated enforcement becomes possible only when the type and volume of crime can be analyzed on the basis of accurate information comprehensively developed and systematically collated.

Information revealing the location, frequency, and nature of crime is essential to this purpose. It is for these reasons that New Jersey's Uniform Crime Reporting System was developed.

DEVELOPMENT

The New Jersey Uniform Crime Reporting Law was enacted on May 16, 1966 and became effective January 1, 1967. Responsibility for the establishment, direction, control and supervision of the Uniform Crime Reporting System was assigned to the Attorney General of the State. After passage of the law, the Attorney General, as provided by the statute, designated the New Jersey State Police as the agency to collect, gather, assemble and collate information from the law enforcement jurisdictions within the state.

Prior to the enactment of the law, and at the request of the Attorney General, the New Jersey State Police conducted research and study of crime reporting systems then operational throughout the country. Study results established that adoption of a reporting program paralleling that of the federal system of Uniform Crime Reporting would be the soundest approach toward development of a state system.The obvious advantage found in the adoption of the federal system included the desirability of having compatible state and federal systems thereby allowing absorption of state crime data into the national level.

The Committee on Uniform Crime Reporting of the New Jersey State Chiefs of Police Association has served the program in an advisory capacity since 1966. The contributions made by this committee have proven invaluable and indeed, insured the success of the program. This body continues to work closely with the Uniform Crime Reporting Unit of the New Jersey State Police to improve further the quality of reporting and to recommend additional program standards, policies and procedures.

During the development phase of the program a study of the federal and various state systems of crime reporting revealed the importance of a sound internal police records system, if accurate crime statistics were to be forthcoming. Upon recognition of this factor, the State Police revised completely their method of internal reporting in order to meet the requirements of the Federal System of Uniform Crime Reporting. This step not only hastened program development but also proved invaluable throughout the operational phase.

Education of contributors to the program in the areas of mechanics, methods and concepts must be a constant operational requirement, if continued system adherence and valid statistics are to be expected. This vital need is satisfied by the personal contact between the four State Troopers assigned as Field Representatives to the program, and the contributors to the system.

The difficult and important task of maintaining close liaison is obvious when it is realized that services now are extended by the New Jersey State Police Uniform Crime Reporting Unit, through its Field Representatives, to the 588 law enforcement agencies of the state. Although each contributor to the program is supplied with the "Uniform Crime Reporting Guide" describing system procedures and mechanics, personnel changes within reporting departments and program refinements make the educational phase a continuing one.

As an adjunct to the program, the New Jersey State Police has offered its revised method of internal reporting to those police departments who wish to adopt it. In all cases of report adoption and record up-dating, assistance is rendered by the Field Representative who provides the necessary guidance and instruction. The personal contact between the Field Representative and the contributor not only serves as a rapid means to resolve areas of report error, but also provides the opportunity to discuss other areas of mutual interest, thus providing an additional communication link between municipal, county and state law enforcement agencies.

PROGRAM EVALUATION

The scope of mandatory crime reporting in New Jersey extends far beyond the stated purpose of the initial program. The compilation and publication of an annual report, which identifies and offers analysis of the extent and nature of crime on a state, county and municipal level, may be considered an end in itself. However, practical application of such data must be made before the program can be judged substantive.

Police executives throughout the state are making increased use of this data in administrative, planning and operational determinations for their respective jurisdictions. During 1977, the State Police Uniform Crime Reporting Unit rendered operational assistance to municipal police agencies by providing individual analysis of statistics as they related to specific crime problems and for use in identifying necessary police manpower and equipment needs. Program requirements have also increased police efficiency in the areas of reporting and recordkeeping. Examples of program application, as discussed here, aid police in their day to day operations and contribute toward the constant effort of upgrading the quality of police services in the community.

The State Law Enforcement Planning Agency, which was established in August of 1968 to conform with the provisions of the Omnibus Crime Control and Safe Streets Act of 1968, has the responsibility of improving law enforcement throughout the state. Since its inception, in all of its determinations as to application of allocated funds, this agency has used analyzed crime data obtained through the Uniform Crime Reporting Program. The establishment of crime rates on state, county and municipal levels with identification of specific crime problems allows the agency to construct priorities, formulate plans and implement these plans to the benefit of the state and all units of local government. This administrative application of such crime data illustrates the far-reaching effect the program has on all efforts to combat crime in the state.

Since 1967, many states have studied the New Jersey system for adoption within their respective states. Several of these presently have ongoing programs based on the New Jersey system and many more of the remaining states are in the process of implementing similar programs.

The element of compatibility of crime statistics between state and federal programs is vital, and evaluation must include consideration of the degree of that compatibility. The Uniform Crime Reporting Unit of the State Police has worked closely with the members of the Federal Bureau of Investigation who administer the National Uniform Crime Reporting Program. Invaluable aid and assistance has been given by the FBI which resulted in the New Jersey program being compatible with that of the national program. This compatibility allows absorption of state crime data into the national system without lengthy and costly conversion processes.

On January 1, 1969, the FBI, who has collected National Uniform Crime Reports in the states and counties since 1930, eliminated the direct collection of National Uniform Crime Reports from the police of New Jersey. This procedure change followed a two-year evaluation of the New Jersey program by the FBI and resulted in an agreement wherein uniform crime reports for each municipality of the state are now being submitted to the national program by the State Police.

REFINEMENT OF THE SYSTEM

The Uniform Crime Reporting Program of New Jersey, in operation since 1967, is recognized as an effective vehicle to increase the efficiency of police operations in every municipality of the state. The System was originally designed to fulfill the need for accurate crime statistics for use in police administration, planning and operations. In its current status it does answer these needs to a great degree, but has not yet reached full potential as an operational tool.

The collection of meaningful data to supplement that which is normally collected is a vital element of the system. This supplemental information regarding crime and the criminal enters the system by way of special surveys and samplings. Periodic collection of such information enables better identification of specific crime problems and those factors which contribute to them. Analysis of refined information and dissemination to contributors provides additional intelligence upon which more effective police action can be based.

Criminal mobility had been surveyed during the earlier stages of the Uniform Crime Reporting Program, however, the mobility of criminals in the state had not been addressed since the advent of New Jersey's extensive Federal Interstate Highway System. To investigate this concern, a sample survey of thirty-nine municipalities traversed by Interstate 80 and 280 was performed, and the subsequent results of this Uniform Crime Reporting Survey confirmed the fact that interstate roadways afford criminals with swift avenues to and from municipalities previously difficult to reach.

Based on the current Uniform Crime Reports submitted by the police departments throughout the state, a monthly "feedback" report is disseminated to each contributor to the program. This "Monthly Crime Trend Feedback Report" presents an accurate account of the status of crime in each municipality of the state. The report contains information as to the type and time of criminal operations and crime targets, as well as the volume and trend of crime within each municipality. In addition to comparing the current month with the same month of last year, further analysis is done for a current cumulative monthly total compared to the same period of last year. A trend for two prior years within the same crime categories is also established.

In addition to Monthly Crime Trend Feedback Reports, the Uniform Crime Reporting Unit updates and implements record-keeping systems for Criminal Justice agencies upon request. To assist in this updating of reporting techniques, the Unit has written, published, and distributed a "Law Enforcement Internal Record Systems Guide" (LEIRS). The Unit also improved its capabilities to provide individual crime analyses for requesting Criminal Justice agencies.

In 1971 crime statistics by urban, suburban, and rural classifications were collated and analyzed for the first time since the beginning of the program in 1967. These statistics were presented in the 1971 publication and will be continued in all future publications.

COLLECTION OF CRIME DATA

As required by statute, all law enforcement agencies in the state submit crime reports to the program. During the year 1979, offense and related supplementary information, as well as arrest and disposition data, were received from 483 full-time municipal police departments, 34 special part-time municipal police departments and the New Jersey State Police who provided the necessary information for the 48 municipalities without local police services.

In addition to the above agencies, arrest and disposition data were received for the state's 21 county prosecutors' and 21 sheriffs' offices, 4 county police departments and 5 county park police departments. In order to incorporate all New Jersey law enforcement under the system, the 8 other state agencies with law enforcement responsibilities were included. Also included are 11 college campus police departments reporting under a pilot program. This amounts to 588 law enforcement agencies reporting.

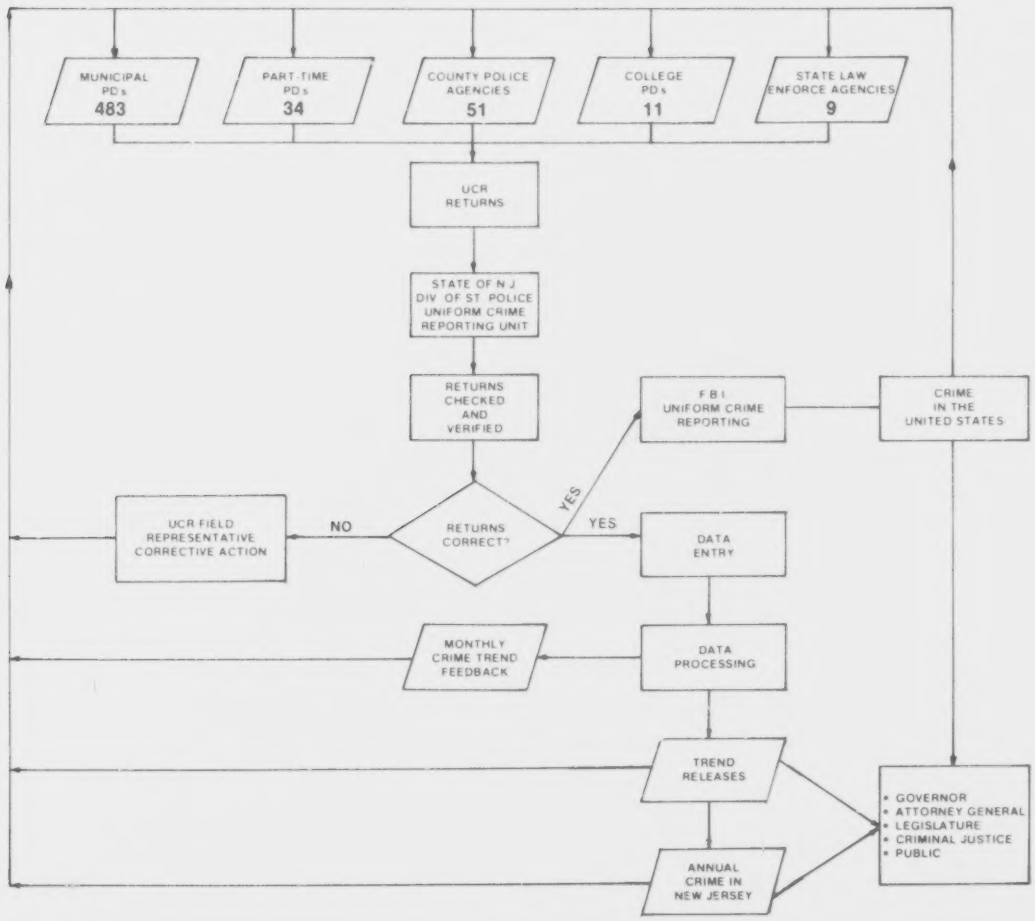
In the interest of satisfying a national, as well as a state need for uniformity, completeness, and accuracy in crime statistics, every report submitted under the system is prepared in triplicate by the contributor. One copy is retained by the contributor and the remaining copies are submitted to the State Police Uniform Reporting Unit, which in turn forwards a copy to the Federal Bureau of Investigation for inclusion in the National Uniform Crime Reporting Program.

METHOD

Reported offenses are related to the municipality in which they occur, rather than to the agency which may investigate, arrest or otherwise in some manner, dispose of the case. The clearance, in every case, is attributed to the municipality in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense. Each contributing agency is responsible for compiling its own reports. The Uniform Crime Reporting Guide, which was revised during 1977, has been distributed to all contributors. It outlines reporting procedures in detail and is complete with examples and illustrations. Field Representatives provide additional instruction and clarification when required.

Municipal law enforcement agencies report the number of known offenses according to the following categories: (1) Homicide, (Murder and Manslaughter), (2) Forcible Rape, (3) Robbery, (4) Aggravated Assault, (5) Burglary, (6) Larceny-Theft, and (7) Motor Vehicle Theft.

NEW JERSEY UNIFORM CRIME REPORTING DATA FLOW CHART



This count is determined from a record of all criminal complaints received by the police from victims or other sources or discovered by the police during their operations. Complaints determined by the police investigation to be unfounded are eliminated from this count. The number of "offenses known" in each crime category is reported without regard to whether anyone is arrested, stolen property is recovered, local prosecutive policy, or any other consideration. Municipal law enforcement agencies also report the total number of these crimes cleared by arrest. A separate category is made for crimes cleared by the arrest of persons under 18 years of age. Certain other analytical data pertaining to specific crime categories are also reported, including for example, total adult and juvenile arrests made during the month. Police killed or assaulted information is also collected by month.

Other monthly report forms contain data such as the number of persons arrested for all criminal offenses with respect to age, sex, and race of the offender. Police employee data is submitted on an annual basis.

In summary, the presentation of this report, "Crime in New Jersey," reflects the compilation of the seven serious "offenses known to police," arrests of persons under 18 years of age and 18 years of age and over. This data is then related to the State of New Jersey, by population groups, character, individual counties, and municipalities.

VERIFICATION PROCESSES

An obvious concern in the collection of crime statistics from 588 law enforcement agencies throughout the state is the uniformity of data received. Program aids such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the contributors; additional controls are therefore necessary.

Each report received by the Uniform Crime Reporting Unit is recorded and examined for mathematical accuracy and, possibly more important, for reasonableness as to interpretation of offense classifications. Fluctuations from levels established by previous reports submitted by the contributor become suspect of inquiry as to reasons for variations. Improper classification, changes in reporting procedures or actual change are identified in this manner. Errors of a minor nature are corrected by direct telephone contact with the contributors, while all other errors are resolved by a personal visit by a Field Representative to the reporting agency. These personal contacts are invaluable to the accuracy of the system. Field Representatives are engaged in a constant educational effort and, as such, provide a vital link between the program and the reporter.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the New Jersey system is based upon the proper classification of offenses by police. The adoption of the federal system of reporting included the utilization of the offense classifications of that system. Law enforcement in this state has made accurate application of those classifications in the reports submitted to the program.

In view of the need for compatibility with the federal system, "offenses" under the program are not distinguished by designation of "high misdemeanors," violations of the Disorderly Persons Act or Municipal Ordinances. The explanation of offense classifications may vary slightly with those employed at the federal level because the language used is familiar to law enforcement in this state. However, the major categories of offense classification remain the same as those employed nationally.

PROFILE OF NEW JERSEY

New Jersey is situated between the major industrial markets of New York and Philadelphia and can be classified as the "Crossroads of the East." The geographic location of the state has been a major factor in its growth and development. The many miles of super-expressway facilities within the state connect New Jersey directly with the neighboring states of New York, Pennsylvania, and Delaware. Additionally, New Jersey as a corridor state, accommodates large volumes of traffic from both the eastern and western part of the United States.

The state is politically comprised of 21 counties which contain 567 incorporated municipalities. Nationally, New Jersey, although 46th in size, ranks ninth in population and first as the most densely populated state in the country. In addition to this density of 978.2 persons per square mile, New Jersey still has many miles of rural areas and sparsely settled communities. The areas of density show a heavy concentration around the major urban centers and those areas most accessible for commuting.

1978 Area In Sq. Miles	1970 Census Population	1978 Provisional Population	1978/1970 Percent Change	1970 Density Per Sq. Mile	1978 Provisional Density Per Sq. Mile
7,495.7	7,168,164	7,349,130	+2.5	954.5	978.2

STATE, COUNTY AND MUNICIPAL PROFILES

The presentation of state, county and municipal profiles in this section is offered for the purpose of projecting, for the consideration of the reader, a group of recognizable factors which may affect the amount and type of crime that occurs from community to community. Selection of the areas of information to be related to individual municipalities was based on the immediacy and completeness of data available.

Population statistics presented here, and throughout this publication, were obtained from the Department of Labor & Industry, Division of Planning and Research, Office of Demographic and Economic Analysis. Provisional 1978 population estimates are used in this publication, and are calculated differently from previous estimation methods. This new method cannot be compared with population estimates previously found in "Crime in New Jersey," but may be compared to the population figures found in the 1970 census.

Character of municipalities by urban, suburban and rural classifications, and square miles, were compiled by the Department of Community Affairs, Division of State and Regional Planning, Bureau of Statewide Planning. Following is a list of categories used and a description of each category:

- URBAN CENTER — Densely populated with extensive development
- URBAN-SUBURBAN — Near an urban center but not as extremely developed and more residential areas.
- URBAN CENTER RURAL — Densely populated core area but surrounded by rural areas
- SUBURBAN — Predominately single family residential, within a short distance of an urban area.
- SUBURBAN RURAL — Rapidly developing area but still large tracts of open land available for development
- RURAL — Scattered small communities and isolated single family dwellings
- RURAL CENTER — High density core area with surrounding municipalities rural
- RURAL CENTER-RURAL — Small developed core area surrounded by rural areas

Certain other socio-economic factors present in varying degrees in all communities may have an influence on resulting crime rates. Obvious difficulties in the identification, documentation and measurement of these factors, however, precluded their application in this report.

Those factors presented were listed to affirm their existence within the county and community and to provide a base for consideration in the evaluation of that community's crime experience.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of New Jersey and project a statewide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to its suppression and detection. The fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time.[1] Enumerated below are some of the factors which, by type and volume, will affect the crime that occurs from place to place.

- Density and size of the community population and the metropolitan area of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status and mores of the population.
- Relative stability of population, including commuter, seasonal, and other transient types.
- Climate.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Effective strength of the police force.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Crime reporting practices of the general citizenry.
- Attitudes of the public toward law enforcement problems.
- The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Cooperation of adjoining and overlapping police agencies.

Crime rates in this publication are based on the stable population of the municipality. Seasonal population figures are too inaccurate and fluctuating to be used as a measurement for determining crime rates. Municipalities with high seasonal populations may indicate a higher crime rate per one thousand than may be normal for a municipality their size.

[1]The Challenge of Crime in a Free Society, Nicholas deB. Katzenbach, Chairman (Washington, D.C.: U.S. Government Printing Office, 1967) p. 92.

THE POLICE POINT OF VIEW 1979

As in the past, the New Jersey State Police Uniform Crime Reporting Unit has been surveying police agencies of the state, attempting to ascertain their viewpoint concerning contributing crime factors. Increased abuse of drugs and alcohol, insufficient manpower, lenient courts, and seasonal population changes, are some of the general type responses received from many of the police agencies.

Many of the specific type responses concerning the increase or decrease of a particular crime have been documented in earlier publications of "Crime in New Jersey," but these viewpoints are still valid and appear again below:

ROBBERY:

Increases

- Availability of new interstate roadways that provide a swift avenue to-and-from communities previously difficult to reach. This factor has also shown a relationship with burglaries in suburban and rural areas.

Decreases

- The addition of highly visible scooter and foot patrols in high density crime areas; selective enforcement; stake out squads are assigned to target areas using analytical information derived by studying past robbery occurrences.

BURGLARY:

Increases

- Husband and wife both working; leaving homes more frequently unoccupied during the daylight hours.
- High truancy rates at Junior High Schools and High Schools has also been noted as a contributor to daytime burglary increases.
- Unoccupied vacation homes being entered during the off-season. Many police administrators cite insufficient manpower to properly patrol these areas as a contributing factor.
- Little or no security measures initiated by the average citizen to protect his own property.
- Juvenile recidivists receiving no detention after they are arrested numerous times for being involved in burglaries.
- Considerable increases in the value of gold and silver make the crime of Burglary even more attractive than in past years.

  Note: Stolen property values (jewelry and precious metals) increased 67 percent over the previous year and historically have a low recovery rate, i.e., 4.7 percent in 1979.

Decreases

- Crime prevention programs are being stressed in many communities as a means of decreasing crime. Programs as "Neighborhood Watch" and "Operation I.D." have proven to be successful as a deterrent to burglaries, as well as other crimes.
- Increased patrols during probable times and location of residential and commercial burglaries.

LARCENY:

Increases

- Larceny of auto parts, and property contained inside motor vehicles is the most common type of larceny being reported to police in New Jersey. This is attributed to:
  - —Shortage of police manpower to adequately patrol parking lot areas.
  - —A lack of security provided by the various shopping malls in their own parking areas.
  - —Availability and visibility of the articles left in the vehicles.
- Shoplifting is a larceny that police have little or no control over. Store security forces are under the control of the store administration, and their arrest policies vary from strict enforcement, arrest and prosecution, to only a warning. Policy change has been directed toward prosecuting the offenders rather than warning them, causing to some extent, an increase in the number of shoplifting offenses reported to police.

Decreases

- Surveillance of shopping mall parking areas, utilizing motor scooters, bicycles and plain clothes foot patrols.
- Use of additional or improved lighting to prevent criminal acts from occurring in parking areas.
- Public awareness programs contribute to the decrease in larceny from parked vehicles. These types of programs also help reduce bicycle thefts.
- Larceny of bicycles has decreased as a result of Safety and Security programs implemented by police in the various schools. This includes the registration and marking of bicycles with special numbers.

MOTOR VEHICLE THEFT:

Increases

- The tremendous replacement cost of auto parts has contributed significantly to the increase in Motor Vehicle Thefts in 1979. The vehicle's value has nearly doubled in recent years, due to the high replacement cost of parts and accessories.

  Note: Stolen motor vehicle values increased 38 percent over 1978, conversely, only 60 percent of the stolen motor vehicles were recovered; the lowest recovery rate ever recorded in the UCR Program, probably due in part to "theft for parts," "chop-shops," etc.

NJSP Table 1

STATEWIDE CRIME SUMMARY — 1979

OFFENSES

- 425,890 Index offenses were reported in New Jersey during the year 1979, a 12 percent increase over 1978.
- Violent crime increased 18 percent.
- Nonviolent crime increased 11 percent.
- $278 million of property was stolen during 1979.
- Robbery was the motive in 17 percent of all murders committed.
- Larceny-theft and Burglary accounted for 79 percent of the state's serious crime.
- During the five year period 1975-1979, rural crime increased 35 percent, suburban crime increased 18 percent and urban crime increased 8 percent.

CLEARANCES

- Law enforcement agencies solved 16.5 percent of all Index offenses during 1979.
- Persons under 18 years of age were responsible for 37 percent of the solved Index offenses in 1979.

ARRESTS

- 334,245 persons were arrested in 1979.
- Adults represented 74 percent of all Violent crime arrests.
- Juveniles accounted for 51 percent of the Nonviolent crime arrests.
- Four of every 10 persons arrested for Robbery were under 18 years of age.
- Six of every 10 persons arrested for Burglary were under 18 years of age.
- One of two persons arrested for Larceny was under 18 years of age.
- Six of every 10 persons arrested for Motor Vehicle Theft were under 18 years of age.
- Six of every 10 persons arrested for Arson were under 18 years of age.
- Persons under 30 years of age represented 91 percent of all Drug Abuse violations.

POLICE OFFICERS KILLED AND ASSAULTED

- Five police officers were killed in the line of duty in 1979.
- 4,316 police officers were assaulted while in the performance of duty in 1979.
- Almost one of every four Municipal police officers in New Jersey was assaulted during the year 1979.

CRIME IN NEW JERSEY
and
CRIME IN THE UNITED STATES
1978/1979

CRIME INDEX

- New Jersey increased twelve percent, while the United States increased eight percent, and the Northeastern states region increased nine percent.

VIOLENT CRIME

- New Jersey increased eighteen percent, the United States and the Northeastern states region increased eleven percent.

NONVIOLENT CRIME

- New Jersey increased eleven percent, while the United States and the Northeastern states both increased eight percent.

INDIVIDUAL INDEX OFFENSES[1]
Percent Change

	New Jersey	United States	Northeastern[2] States
Murder	+21	+ 9	+11
Forcible Rape	+16	+12	+10
Robbery	+30	+12	+14
Aggravated Assault	+ 7	+ 9	+ 7
Burglary	+10	+ 6	+ 5
Larceny-Theft	+ 9	+ 9	+10
Motor Vehicle Theft	+24	+10	+ 8

(1) United States and Northeastern states statistics are preliminary.
(2) Northeastern States Region: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, New Jersey, New York, Pennsylvania.

CRIME INDEX PROJECTIONS

The Crime Index volume projections which are shown in this Section, are estimates computed by a Least-Squares Linear Regression Method. They are based upon the raw data of the past decade and supersede any previous estimates. These predictions are not point estimates but trend estimates, and the actual 1980 and 1981 Index offense volumes may vary as much as plus or minus 7 percent from estimates shown. Volumes occurring outside the projected range represent a significant change, and further research is recommended to pinpoint possible influencing crime factors responsible for the directional change.

The following Table depicts the rounded projections made for the Crime Index and each Index offense for the years 1980 and 1981.

OFFENSES	Projected Volume for 1980	Projected Volume for 1981
Murder	440	440
Forcible Rape	1,950	2,050
Robbery	16,100	16,280
Aggravated Assault	16,500	17,340
Burglary	121,860	125,860
Larceny-Theft	241,760	254,210
Motor Vehicle Theft	42,980	43,260
Crime Index	441,590	459,440
Violent Crime	34,990	36,110
Nonviolent Crime	406,600	423,330

Analysis of the above Table reveals that the projected New Jersey Crime Index volume, during Calendar Year 1980, will be approximately 4 percent higher than 1979.

STATEWIDE CRIME AND ARREST DATA

1979 Total Crime Index Summary Analysis

VOLUME/RATE

- There were 425,890 index offenses reported to law enforcement agencies of New Jersey during 1979, a 12 percent increase when compared to 1978.
- The crime rate of the State of New Jersey was established at 58.0 victims per Index Offense, for every 1,000 permanent inhabitants.

Example: 58.0 Crimes per 1,000 inhabitants
579.5 Crimes per 10,000 inhabitants
5,795.1 Crimes per 100,000 inhabitants

CRIME TRENDS—NUMBER—RATE
1978—1979

INDEX OFFENSES	YEAR	NUMBER OF OFFENSES	PERCENT CHANGE	RATE PER 1,000 INHABITANTS	* PERCENT CHANGE

*Rate percent change calculated before rounding

NJSP Table 2

- July, with 41,445 offenses reported, recorded the highest incidence of Crime Index offenses.
- Total value of property stolen increased 35 percent to $277.5 million from the $206.1 million reported in 1978.
- Value of property recovered was $84.3 million, resulting in a recovery rate of over 30 percent.
- Stolen motor vehicles accounted for 47 percent of stolen property value, and 87 percent of the recovered property value.

TYPE AND VALUE OF PROPERTY STOLEN AND RECOVERED 1978 — 1979

TYPE OF PROPERTY	YEAR	VALUE OF PROPERTY STOLEN	VALUE OF PROPERTY RECOVERED	PERCENT OF VALUE RECOVERED

	1979	***277,570,463**	**84,301,336**	**30.4**

NJSP Table 3

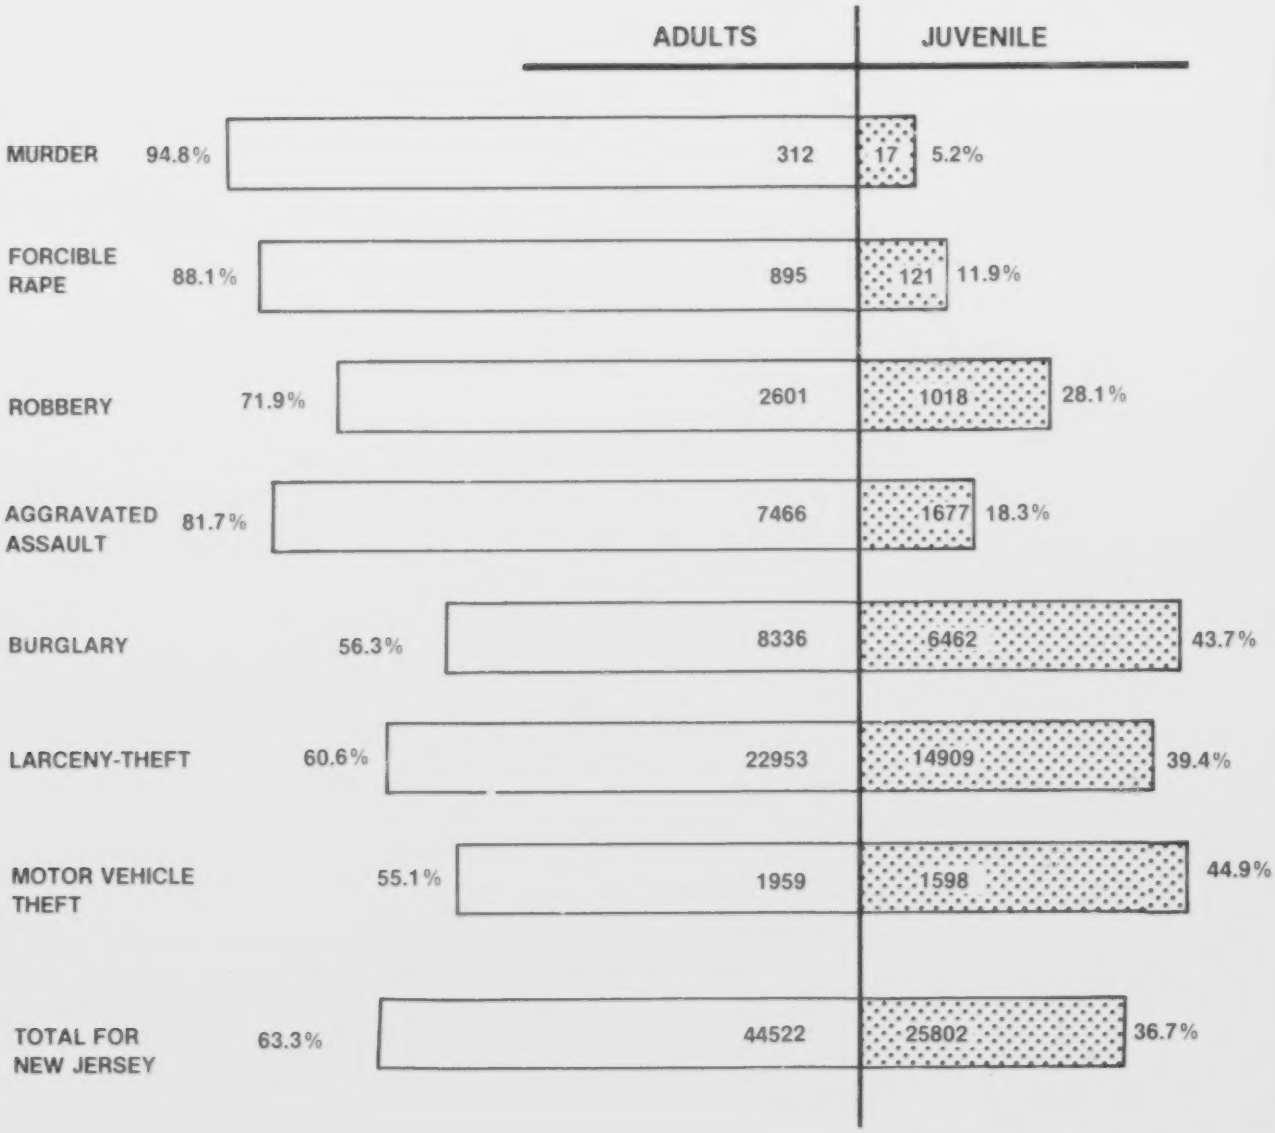
*Total includes proceeds of $60,631 from murder and rape offenses.

ARRESTS/CLEARANCES

- A total of 77,904 persons were arrested for serious Crime Index offenses, representing an 8 percent increase over 1978.
- Crime Index arrests accounted for 23 percent of the total arrests during 1979.
- Adult Index arrests increased 13 percent and registered a 54 percent involvement. Juvenile Index arrests rose 2 percent, and accounted for 46 percent of the Index arrests.
- Males accounted for 81 percent, and females 19 percent of persons arrested for Index offenses.
- Sixty percent of all persons arrested for Crime Index offenses were White, 39 percent were Negro, and one percent were of other races.
- Seventeen percent of all Index offenses were cleared during 1979. Persons under 18 years of age represented 37 percent of those cases solved.

PERCENT AND NUMBER OF INDEX OFFENSES CLEARED BY ARREST OF ADULTS AND JUVENILES

1979



NJSP Chart 13

1979 VIOLENT CRIME SUMMARY ANALYSIS

VOLUME/RATE

- There were 36,560 Violent Crimes reported in calendar year 1979, resulting in an 18 percent increase over 1978.
- Violent crimes accounted for 9 percent of the total Crime Index.
- The Violent Crime Rate was established at 5.0 victims for every 1,000 inhabitants of New Jersey.

TREND

Year	Number of Offenses	Rate per 1,000 Population
1978	31,007	4.2
1979	36,560	5.0
Percent Change	+18%	+19%

- December recorded the highest number of Violent Crimes with 3,345 offenses.
- The total value of property stolen during the commission of Violent Crimes was $9.7 million in 1979.

ARRESTS/CLEARANCES

- a total of 14,717 persons were arrested for violent crime offenses, a 5 percent increase over 1978.
- Violent crime arrests accounted for 19 percent of the Index arrests and 4 percent of the total arrests for 1979.
- Adult arrests for violent crime increased 3 percent, while juvenile violent crime arrests increased 10 percent.
- Adults accounted for 74 percent of the violent crime arrests and juveniles the remaining 26 percent.
- Males were responsible for 91 percent and females 9 percent of persons arrested for violent crime offenses.
- Negroes accounted for 51 percent, white 48 percent and the remaining one percent were of other races of all violent crimes arrests in 1979.
- Thirty-nine percent of all violent crimes were solved during 1979, a decrease from the 46 percent cleared in 1978.
- Juveniles were involved in 20 percent of all cases cleared in 1979.

NJSP Chart 14

1979 NONVIOLENT CRIME SUMMARY ANALYSIS

VOLUME/RATE

- There were 389,330 Nonviolent Crimes reported during 1979, an 11 percent increase when compared to 1978.
- Nonviolent crimes accounted for 91 percent of the total Crime Index.
- Additional analysis reveals that Burglary and Larceny accounted for 79 percent of the total Crime Index during 1979.
- The Nonviolent Crime Rate was established at 53.0 victims for every 1,000 inhabitants of New Jersey.

TREND

Year	Number of Offenses	Rate per 1,000 Population
1978	350,533	47.7
1979	389,330	53.0
Percent Change	+11%	+11%

- July, with 38,180 offenses, recorded the highest incidence of Nonviolent crimes during 1979.
- The total value of property stolen during the commission of Nonviolent crimes amounted to $267.8 million dollars.

ARRESTS/CLEARANCES

- A total of 63,098 persons were arrested for nonviolent crimes, a 9 percent increase over 1978.
- Nonviolent crime arrests accounted for 81 percent of the Index arrests and 19 percent of the total arrests reflected during 1979.
- Juveniles were responsible for 51 percent of the nonviolent crime arrests and adults 49 percent.
- Adult nonviolent crime arrests increased 17 percent, and juvenile arrests rose one percent.
- Males represented 79 percent, and females 21 percent of persons arrested for the nonviolent crimes against property.
- Sixty-three percent of all persons arrested for nonviolent crimes were white, 36 percent were negro and the remaining one percent were of other races.
- Fourteen percent of all nonviolent crimes reported during 1979 were solved, and 41 percent of those solved cases were cleared by the arrest of juveniles.

NJSP Table 4

MURDER

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault, or commission of a crime is included. This Index offense is counted by police on the basis of their investigation without regard to findings of a court, jury or the decision of a prosecutor. Attempts to kill and assaults to kill are scored as aggravated assaults and not as murder. Suicides, accidental deaths, and justifiable homicides are not counted, nor reflected in the murder classification.

1979 SUMMARY ANALYSIS

VOLUME/RATE

- There were 482 murders reported by the law enforcement agencies of the state in 1979, a 21 percent increase over the previous year.
- Murders accounted for one-tenth of one percent of the reported Index offenses.
- The murder rate remained the same at .1 victims per 1,000 inhabitants.

TREND

Year	Number of Offenses	Rate per 1,000 Population
1978	400	0.1
1979	482	0.1

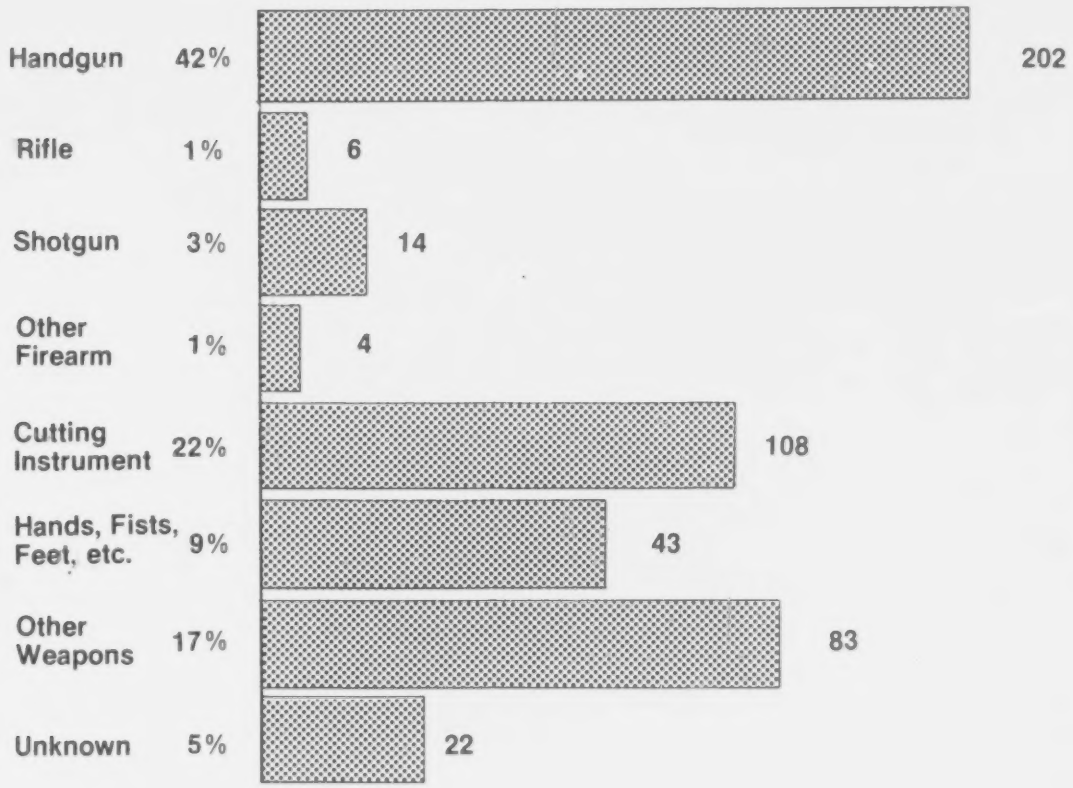
NJSP Table 5

- August and October recorded the highest number of murders, with fifty each month, June was the lowest reported with twenty-six offenses.
- Murder by day of week disclosed Friday to be the highest day of occurrence, with eighty-six offenses.
- The age group 20-34 accounted for 42 percent of all murder victims.
- Fifty-two percent of murder victims were negro, 48 percent were white, and 72 percent of the victims were male.

- Firearms were used in 47 percent of all reported murders. This is the highest percent distribution since 1972, when 52 percent of the offenses were the direct result of firearms. Cutting or stabbing instruments accounted for 22 percent; other weapons, i.e., clubs, hammers, poison, arson, etc., accounted for 17 percent, and physical force, such as hands, fists and feet were used in the remaining 9 percent of the murder offenses.

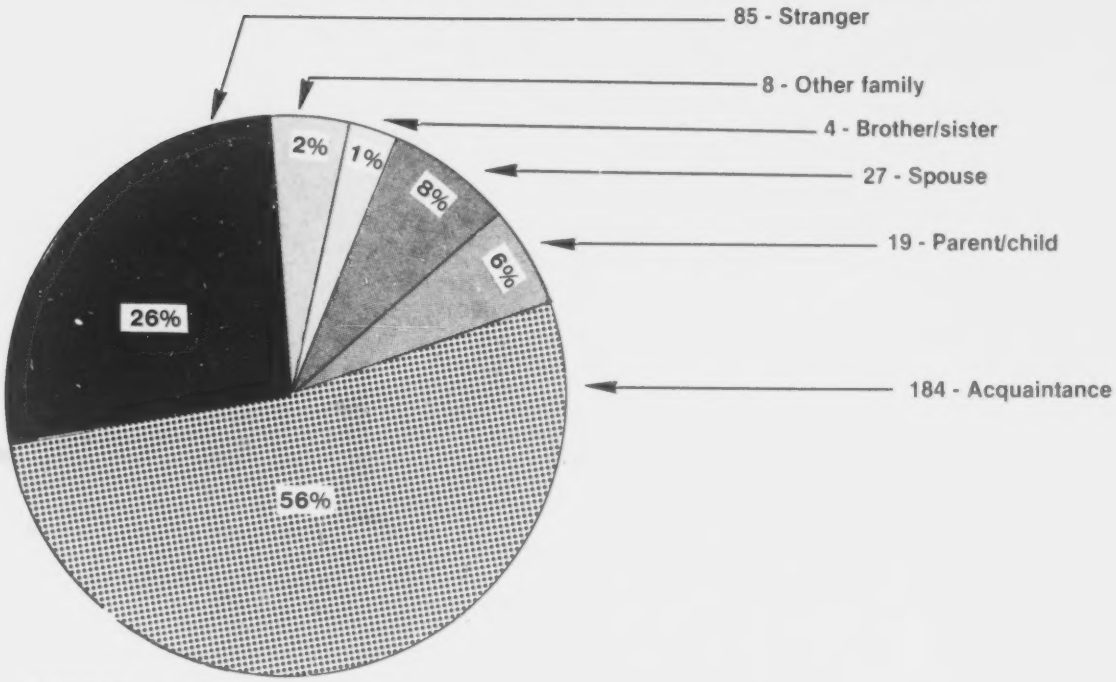
MURDER — Distribution by Type of Weapon



NJSP Chart 17

- Forty-six percent of the reported murders occurred in private residences, 33 percent on highway or streets, and 4 percent in bars.
- Seventy-four percent of the murder victims were either acquainted or related to their assailant.
- Eight percent of the known murders were the result of spouse killing spouse, and 15 percent of the perpetrators were identified as members of the immediate family.

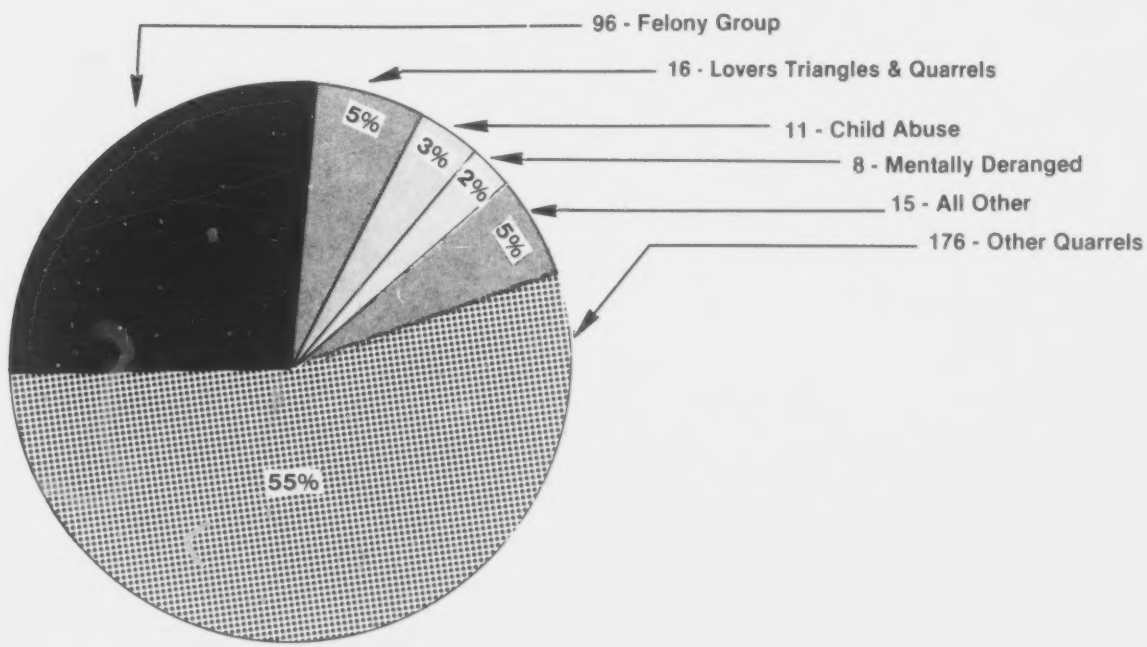
1979 RELATIONSHIP OF VICTIM TO OFFENDER (1)



NJSP Chart 18

(1) Additionally there were 155 murders in which the relationship could not be determined.
Percent distribution may not add to 100% due to rounding.

1979 — KNOWN MURDER CIRCUMSTANCES (1)



NJSP Chart 19

(1) Additionally there were 160 murders in which the circumstances could not be determined.

- Altercations and quarrels between victims and perpetrator continue to account for most murders, 60 percent this year.
- Felony murders account for 30 percent of all reported murders, with Robbery being identified as the motive in 17 percent of these offenses.
- The total value of property stolen resulting from all murders, amounts to $30,065.00.

ARRESTS/CLEARANCES

- A total of 398 persons were arrested for murder during 1979, an 11 percent increase over 1978.
- Adult murder arrests increased 12 percent (from 320 to 358), while juvenile arrests increased only 3 percent (from 39 to 40).
- The age group 20-24 accounted for 28 percent of persons arrested for murder. Males accounted for 91 percent and females accounted for 9 percent of all persons arrested.
- Sixty percent of persons arrested for murder were negro and 40 percent were white.
- 329 of the 482 murders were solved during the year 1979, reflecting a 68 percent clearance rate, the lowest clearance rate ever recorded.
- The juvenile clearance rate for murder was slightly more than 5 percent of all cases solved.

MURDER SCENARIO

A negro male between 25 and 29 years of age, living in an Urban area, is shot on a Friday at his place of residence with a handgun by a friend or a relative, during an argument. The offender, a negro male, between the age of 20-24 has an almost 70 percent chance of being arrested.

FORCIBLE RAPE

Forcible Rape is defined as the carnal knowledge of a female forcibly and against her will. All assaults and attempts to rape are counted, but carnal abuse, rape without force (statutory rape) and other sex offenses are not included.

1979 SUMMARY ANALYSIS

VOLUME/RATE

- There were 2,004 forcible rapes reported in New Jersey during 1979. This represents a 16 percent increase over 1978.
- Forcible rape accounted for one-half of one percent of the total crime Index and almost 6 percent of all violent crimes.
- For every 1,000 persons in the state, there were .3 forcible rape victims. When calculated on the estimated 1976 female population, the forcible rape rate increases to .5 per 1,000 females.
- Seventy-four percent of the rapes were forcible; the remaining 26 percent were assaults or attempts to rape.

TREND

Year	Number of Offenses	Rate per 1,000 Population*
1978	1,727	0.2
1979	2,004	0.3
Percent Change	+16%	

*Rate percent change calculated before rounding.

- The total value of property stolen during the commission of forcible rapes amounted to $30,566.00.

ARRESTS/CLEARANCES

- A total of 1,028 persons were arrested during 1979, a 7 percent increase over 1978.
- Adult forcible rape arrests increased 5 percent, while juvenile arrests increased 16 percent over 1978.
- Fifty-seven percent of all persons arrested for forcible rape were under the age of 25.
- Fifty-eight percent of the arrested perpetrators were negro, 41 percent were white and one percent were other races.
- Fifty-one percent of all forcible rape cases were solved during 1979. Persons under 18 accounted for 12 percent of those cases cleared.

FORCIBLE RAPE SCENARIO

A woman living in an Urban area is forcibly raped by a negro male between the age of 18 to 21. There is a one in two probability that the offender will be apprehended.

ROBBERY

Robbery is defined as the felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. The element of personal confrontation is always present in this crime. Under the program, all assaults or attempts to rob are included. Effective January 1, 1974, the robbery subheadings were changed from armed and strong arm, to robbery by firearm, knife or cutting instruments, other dangerous weapon and strong arm (hands, fists, feet, etc.)

1979 SUMMARY ANALYSIS

VOLUME/RATE

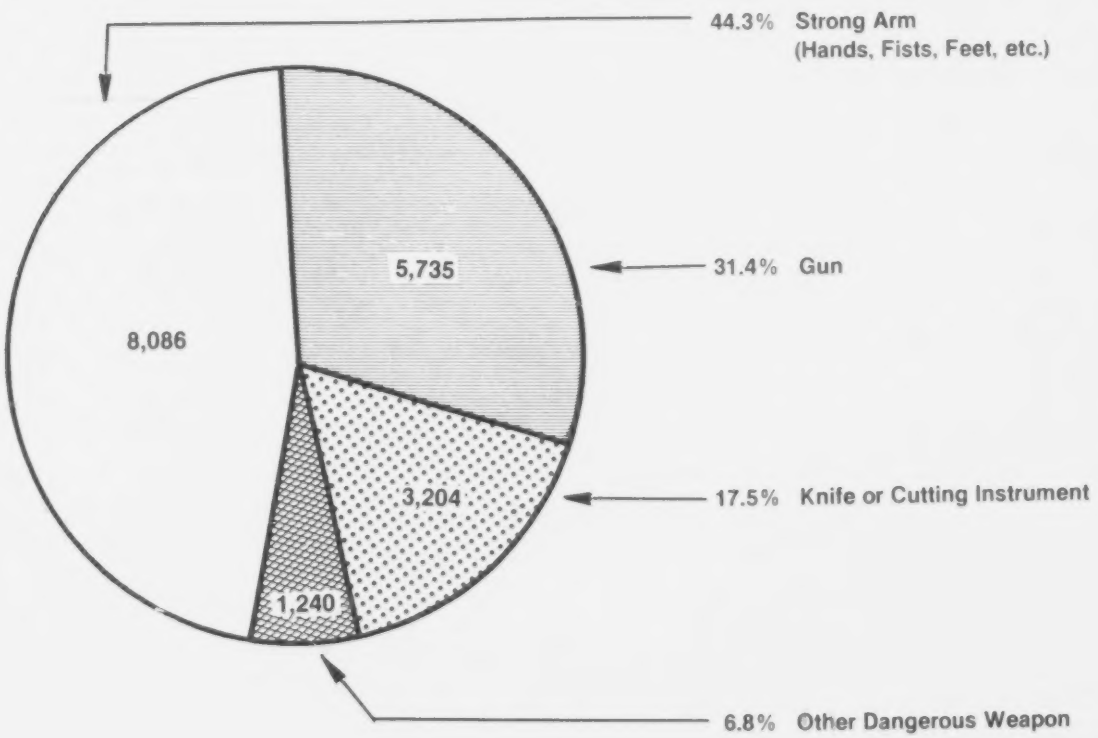
- There were 18,265 robberies reported during 1979, a 30 percent increase over 1978. This represents the highest percent increase within the Index, and highest number of offenses since 1975 when 16,273 robberies were reported.
- Robbery accounted for 4 percent of the total Crime Index and 50 percent of all violent crimes.
- The robbery rate was 2.5 victims per 1,000 population.

TREND

Year	Number of Offenses	Rate per 1,000 Population
1978	14,096	1.9
1979	18,265	2.5
Percent Change	+30%	+32%

- Fifty-six percent of the robberies were committed by an armed perpetrator, and the remaining 44 percent were committed by the use of strong-arm tactics.

ROBBERY WEAPONS USED 1979



NJSP Chart 20

- Street robberies accounted for 63 percent of all reported robberies, and showed a 41 percent increase over 1978.
- Bank robberies, though only accounting for one percent of all robberies, also reflected a high percentage increase of 41 percent (from 145 to 205).
- Total value of property stolen during the commission of all robberies amounted to $9,635,648.

AGGRAVATED ASSAULT

Aggravated Assault, as defined under the New Jersey Uniform Crime Reporting System, is an attempt or offer, with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could result in serious personal injury if the crime was successfully completed.

1979 SUMMARY ANALYSIS

VOLUME/RATE

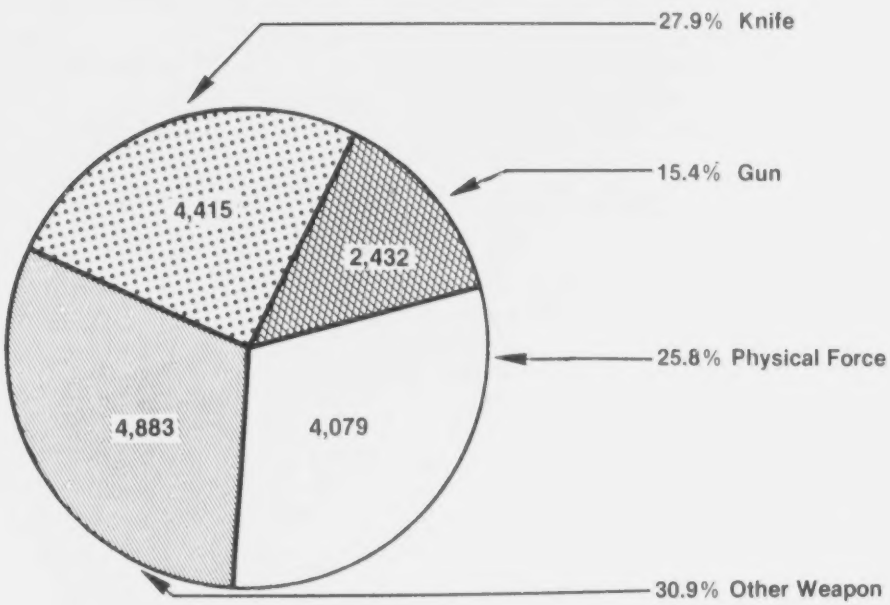
- There were 15,809 aggravated assaults reported during calendar year 1979, a 7 percent increase over the previous year. This is the highest number of assaults ever recorded; the previous high was 14,784, in 1978.
- Aggravated assaults accounted for 4 percent of the total Crime Index and 43 percent of all violent crimes.
- For every 1,000 persons in the state, 2.2 were victims of this crime.

TREND

Year	Number of Offenses	Rate per 1,000 Population
1978	14,784	2.0
1979	15,809	2.2
Percent Change	+7%	+10%

- Other dangerous weapons (i.e., clubs, bricks, tire irons, etc.) were used in 31 percent of all reported aggravated assaults. The second most frequently recorded weapon was a cutting instrument, identified in 28 percent of the offenses.

AGGRAVATED ASSAULT WEAPONS USED 1979



NJSP Chart 21

ARRESTS/CLEARANCES

- A total of 8,640 persons were arrested for Aggravated Assault during 1979, a 2 percent increase when compared to 1978.
- Juvenile arrests increased 10 percent, while adult arrests registered slightly less than a one percent decrease. Males accounted for 88 percent and females 12 percent of all Aggravated Assault arrests.
- Fifty-six percent of persons arrested for Aggravated Assault were white, 43 percent negro and the remaining one percent were other races.
- Fifty-eight percent of all Aggravated Assault cases reported in 1979 were solved. Juveniles accounted for 18 percent of the cleared cases.

AGGRAVATED ASSAULT SCENARIO

A person is assaulted with a dangerous weapon (club, brick, etc.) by a 17 year old white male. The aggressor will be identified and apprehended in three out of five cases.

BURGLARY

Under this program, Burglary is defined as an unlawful entry or attempted entry of any structure to commit a felony or larceny. Data collection for this offense is further categorized as forcible entry, unlawful entry (where no force is used) and attempted forcible entry.

1979 SUMMARY ANALYSIS

VOLUME/RATE

- There were 117,244 Burglaries reported during 1979, for a 10 percent increase over 1978. This is the highest volume recorded since the previous high of 111,264 in 1975.
- Burglary accounted for 28 percent of the total Crime Index and 30 percent of all nonviolent crimes.
- The victimization rate for Burglary was 16 victims for every 1,000 inhabitants, a 10 percent rise when compared to 1978.

TREND

LARCENY-THEFT

The definition of Larceny-Theft, as provided under this program, is the taking of the property of another with intent to deprive him of ownership. All larcenies and thefts resulting from pocket-picking, purse-snatching, shoplifing, larcenies from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., are included here. Embezzlement, unlawful conversions, larceny by bailee, frauds or bad check cases are not included.

1979 SUMMARY ANALYSIS

VOLUME/RATE

- There were 221,080 Larcenies reported to New Jersey law enforcement agencies, reflecting a 9 percent increase over 1978. This represents the highest number of larcenies reported since the 1976 high of 219,357.
- Larceny accounted for 52 percent of the total Crime Index and 57 percent of all nonviolent crimes.
- Larceny victimization rate of 30.1 for every 1,000 persons increased 9 percent over 1978.

TREND

Year	Number of Offenses	Rate per 1,000 Population
1978	202,753	27.6
1979	221,080	30.1
Percent Change	+9%	+9%

- Volumewise, Larcenies from Motor Vehicles, (clothing, luggage, etc.) and Larcenies of Motor Vehicle Parts and Accessories, (car radios, gasoline, etc.) accounted for 39 percent of all Larcenies reported.
- Purse-snatching, and Larceny from Auto, registered the most significant percentage increase, each recording a 13 percent rise.

MOTOR VEHICLE THEFT

In Uniform Crime Reporting, Motor Vehicle Theft includes all thefts and attempted thefts of a motor vehicle. This includes the theft or attempted theft of a motor vehicle which is defined as a self-propelled vehicle that runs on the surface and not on rails. This definition excludes taking a motor vehicle for temporary use, such as a family situation, or unauthorized use by others having lawful access to the vehicle. The motor vehicle theft category includes the subheadings of autos, trucks and buses, and other vehicles (motorcycles, mo-peds, etc.).

VOLUME/RATE

- There were 51,006 motor vehicles stolen in 1979, a 24 percent increase when compared to 1978. This represents the highest number of motor vehicle thefts since the previous high of 43,229 recorded in 1972.
- Motor Vehicle Theft accounted for 12 percent of the total Crime Index and 13 percent of the nonviolent crimes.
- The Motor Vehicle Theft rate increased to 6.9 victims per 1,000 population, which is a 24 percent increase over 1978.

TREND

Year	Number of Offenses	Rate per 1,000 Population
1978	41,037	5.6

PART II — ARREST SUMMARY

OTHER ASSAULTS (NOT AGGRAVATED)

Other Assaults, as defined under the New Jersey Uniform Crime Reporting System, are assaults or attempted assaults which are not of an aggravated nature and do not result in serious or aggravated injury to the victim.

1979 ARREST SUMMARY

- There were 34,127 Simple Assault arrests during the year, representing a one percent increase when compared to 1978.
- Juvenile arrests increased 2 percent, accounting for 28 percent of the Simple Assault arrests.
- Adult assault arrests increased less than one percent and represented 72 percent of the total arrests for assault.
- Males accounted for 84 percent, and females 16 percent of the persons arrested for assault.
- Seventy-one percent of the persons arrested were white, 28 percent were negro, and the remaining one percent were of other races.

ARSON

Under this Program, Arson is defined as the willful or malicious burning, or attempts to burn, with or without intent to defraud, a dwelling house, public building or any building, ship or vessel, motor vehicle or aircraft, contents of building, personal property of another, etc.

1979 ARREST SUMMARY

- There were 840 arrests reported for Arson offenses, an 8 percent decrease over 1978.
- Juveniles accounted for 59 percent and adults 41 percent of persons arrested for Arson.
- Males were arrested in 92 percent of the cases, and females in 8 percent.
- Seventy-eight percent of the persons arrested were white, 22 percent were negro, and less than one percent were other races.

FORGERY AND COUNTERFEITING

The definition of Forgery and Counterfeiting, is the making, altering, uttering, or possessing or attempts to make, alter, utter or possess with intent to defraud, anything false which is made to appear true.

1979 ARREST SUMMARY

- There were 1,706 arrests reported by the law enforcement agencies of the state for Forgery or Counterfeiting during the year. This represents a decrease of 10 percent.
- Adults accounted for 90 percent and juveniles 10 percent of the arrests.
- Males were arrested in 80 percent of the cases, and females 20 percent.
- Fifty-nine percent of the persons arrested were white, 38 percent were negro, and 3 percent were of other races.

FRAUD

In Uniform Crime Reporting, Fraud is the fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks, confidence games, etc., except forgeries and counterfeiting.

1979 ARREST SUMMARY

- There were 8,178 arrests reported during the year for Fraud, a 3 percent increase over 1978.
- Adult arrests represented 93 percent and juveniles 7 percent of the persons arrested.
- Males were arrested in 60 percent of the cases, and females 40 percent. Sixty-seven percent of the persons arrested were white, 32 percent were negro, and one percent were of other races.

EMBEZZLEMENT

The definition of Embezzlement is the misappropriation or misapplication of money or property in trust to one's care, custody or control.

1979 ARREST SUMMARY

- There were 388 persons arrested for Embezzlement, a seven percent decrease over 1978.
- Ninety-two percent of the arrests were that of adults, and percent were juveniles.
- Males were arrested in 72 percent of the cases, and females 28 percent.
- Seventy-six percent of the persons arrested were white, and 24 percent were negro.

STOLEN PROPERTY — BUYING, RECEIVING, POSSESSING

Included in this class are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

1979 ARREST SUMMARY

- In 1979 there were 9,868 arrests made for stolen property—an increase of one percent over 1978.
- Of the total, 58 percent were adults, and 42 percent were juveniles.
- Ninety-one percent were males, and 9 percent were females.
- Fifty-eight percent were white, 41 percent were negro, and one percent were of other races.

MALICIOUS MISCHIEF

Malicious Mischief, as defined under the New Jersey Uniform Crime Reporting System, is the willful or malicious destruction, injury, disfigurement or defacement of property without consent of the owner or persons having custody or control.

1979 ARREST SUMMARY

- There were 16,229 arrests made for Malicious Mischief, an increase of 18 arrests over 1978.
- Juveniles accounted for 68 percent, and adults 32 percent of persons arrested for Malicious Mischief.
- Males were arrested in 92 percent of the cases, and females 8 percent.
- Eighty-three percent of the persons arrested were white, 16 percent were negro, and the remaining one percent were of other races.

WEAPONS: CARRYING, POSSESSING, ETC.

Under this program, this offense includes all the violations of regulations or statutes controlling the carrying, using, possessing, furnishing and manufacturing of deadly weapons or silencers and attempts.

1979 ARREST SUMMARY

- In 1979, 6,413 arrests were reported for Weapons offenses, a 5 percent increase compared to 1978.
- Of the total, 73 percent were adults, and 27 percent were juveniles.
- Males were arrested in 94 percent of the cases, and females 6 percent.
- Sixty-two percent of the persons were white, 37 percent negro, and one percent were of other races.

PROSTITUTION AND COMMERCIALIZED VICE

The definition of Prostitution and Commercialized Vice are sex offenses of a commercialized nature and attempts, such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes.

1979 ARREST SUMMARY

- There were 692 arrests recorded during the year—for Prostitution and Commercialized Vice—a 15 percent trend decline from arrests reported in 1978.
- Ninety-five percent of the arrests were adults, while juveniles were arrested in 5 percent of the cases.
- Females were arrested in 68 percent of the cases, and males 32 percent.
- Negroes were arrested in 60 percent of the cases, whites in 39 percent, and other races one percent.

SEX OFFENSES

Sex offenses, as defined under the New Jersey Uniform Crime Reporting Program, does not include forcible rape, prostitution and commercialized vice. Included in this class are statutory rape, offenses against chastity, common decency, morals, and the like; attempts are also included.

1979 ARREST SUMMARY

- There were 1,790 sex offense arrests during the year, representing an increase of 3 percent when compared to 1978.
- Adults accounted for 65 percent and juveniles 35 percent of the arrests.
- Males were arrested in 93 percent of the cases, and females 7 percent.
- Seventy-four percent of the persons arrested were white, 25 percent were negro, and one percent were of other races.

DRUG ABUSE VIOLATIONS

Under this program, Drug Abuse Violations are defined as the unlawful Sale/Manufacturing, Possession/Use of the below listed narcotics and drugs.

a. Opium or Cocaine and their Derivatives (Morphine, Heroin, Codeine)
b. Marijuana, Hashish, etc.
c. Synthetic Narcotics — Manufactured Narcotics which can cause true drug addiction — (Demerol, Methadones)
d. Other — Dangerous Non-narcotic Drugs (Barbiturates, Amphetamines, Hallucinogens).

1979 ARREST SUMMARY

- There were 29,611 arrests reported by the law enforcement agencies of the state for Drug Abuse Violations, a 16 percent decrease compared to 1978.
- Adults accounted for 70 percent of the arrests, and juveniles 30 percent.
- Persons under 21 years of age accounted for 58 percent of the drug abuse arrests.
- Males registered 87 percent of the arrests, while females accounted for the remaining 13 percent.
- Seventy-five percent of the persons arrested were white, 24 percent were negro, and one percent were of other races.
- Arrests for Possession/Use of drugs accounted for 88 percent of the arrests, and the remaining 12 percent were for the Sale/Manufacture of drugs.
- Marijuana arrests represented 82 percent of the Possession/Use arrests, and 55 percent of the Sale/Manufacture arrests. Overall, they accounted for 79 percent of the total Drug Abuse Violation arrests.

SECTION V

INDEX OFFENSE ANALYSIS

- POPULATION GROUPS
- URBAN-SUBURBAN-RURAL MUNICIPALITIES
- COLLEGES AND UNIVERSITIES

OFFENSES BY POPULATION GROUPS

The presentation of crime statistics by population groups was made for the purpose of projecting, for consideration, the relative crime experience of communities of varying populations. Although the individual municipalities within the various groups may be geographically separated, their inclusion into a specific group was predicted by the similarity in population with the other municipalities within the group. Municipalities within the same group may differ widely when all factors are considered, but they do share the common bond of population size. The grouping of communities in this manner allows recognition of variances in the crime volumes, rates and clearances between the established groups.

Set forth below are the established municipal groupings as used in this section:

GROUP I
4 Municipalities over 100,000
Total Population - 797,525

GROUP II
17 Municipalities 50,000 to 100,000
Total Population - 1,151,379

GROUP III
46 Municipalities 25,000 to 50,000
Total Population - 1,630,931

GROUP IV
66 Municipalities 15,000 to 25,000
Total Population - 1,262,238

GROUP V
208 Municipalities 5,000 to 15,000
Total Population - 1,935,775

GROUP VI
144 Municipalities 2,000 to 5,000
Total Population - 478,203

GROUP VII
82 Municipalities under 2,000
Total Population - 93,079

URBAN—SUBURBAN—RURAL CRIME

5 YEAR COMPARISON
URBAN-SUBURBAN-RURAL

1975 through 1979 Summary Analysis

- During the 5 year period, Rural communities continued to experience the largest Index offenses percentage change, registering an increase of 35 percent.
- Suburban municipalities recorded the next highest Index increase advancing 18 percent.
- Urban communities reported the lowest percentage increase, reflecting a rise of 8 percent.
- Nonviolent crimes increased at a faster rate in Rural municipalities than Suburban or Urban areas.
- Aggravated Assault recorded the highest individual Index crime increase in each of the areas; up 34 percent in Rural, 62 percent in Suburban, and 23 percent in Urban municipalities.

URBAN
1979 Summary Analysis

- There were 243,102 Index offenses reported in municipalities of Urban character during the year 1979, representing an increase of 14 percent over 1978.
- Fifty-seven percent of all Index crimes occurred in Urban areas; a two percent increase compared to 1978.
- Violent crimes increased 19 percent, and accounted for 79 percent of the state's total Violent crime.
- Nonviolent crimes rose 13 percent and accounted for 55 percent of the reported Nonviolent crime.
- The crime rate increased 15 percent, to 68.8 victims for every 1,000 persons.
- Significant increases were noted in the offenses of Forcible Rape, Robbery, and Motor Vehicle Theft.

SUBURBAN
1979 Summary Analysis

- During the year, Index crimes in Suburban areas increased 9 percent, to 152,008 offenses.
- Suburban communities recorded 36 percent of the Index crimes that occurred during the year.
- Violent crime advanced 16 percent, and accounted for 18 percent of the state's total.
- Nonviolent crime increased 9 percent, and accounted for over 37 percent of the total reported.
- The crime rate was recorded at 49.8 victims for every 1,000 Suburban inhabitants, an increase of 8 percent over 1978.
- Significant increases were noted in the offenses of Murder, Motor Vehicle Theft, and Aggravated Assault.

RURAL
1979 Summary Analysis

- There were 30,780 Index offenses reported in Rural municipalities during the year 1979, an increase of 10 percent when compared to 1978.
- Seven percent of the state's Index crime occurred in Rural areas.
- Violent crime increased 6 percent and accounted for 4 percent of the state's total.
- Nonviolent crimes increased 10 percent, and was responsible for almost 8 percent of the state's total.
- Victimization rate was established at 40.5 persons for each 1,000 inhabitants of Rural areas, an increase of 8 percent over 1978.
- Significant increases were noted in the offenses of Larceny, Forcible Rape, and Motor Vehicle Theft.

SECTION VI

CRIME IN THE SEVENTIES

AN
URBAN PHENOMENON

CRIME IN THE SEVENTIES — AN URBAN PHENOMENON

One of the most fully documented facts about crime is that the serious crimes that concern people most—Murder, Forcible Rape, Robbery, Aggravated Assault, Burglary—happen most frequently in our large cities.[2] Study after study, in city after city, in all regions of the country, the fact remains that the offenses, the victims, and the offenders are found most often in our large cities.

The Tables and Charts enumerated in this section cover a ten year period delineating crime in specifically defined Urban areas of New Jersey. The cities included in this analysis have been categorized as Urban municipalities, (i.e., densely populated with extensive development) by the New Jersey Department of Community Affairs, Division of State and Regional Planning, Bureau of Statewide Planning.

The criteria used in the selection of the fourteen cities was, (1) To be classified as Urban character and (2) Have a 1978 provisional population of 50,000 or more inhabitants.

For further comparative analysis, the Urban cities were subdivided into two distinct groupings. Group number one consisted of the state's six largest Urban centers with populations of 85,000 or over and categorized as the "Major Urban."

The second group included the "Major Urban" and the additional eight Urban communities with populations of 50,000 or more inhabitants, and referred to as the "Urban 14."

MAJOR URBAN

- Camden
- Elizabeth
- Jersey City
- Newark
- Paterson
- Trenton

THE URBAN FOURTEEN

- Bayonne

CRIME IN THE SEVENTIES
SUMMARY

Distribution

- Six major Urban centers—Camden, Newark, Jersey City, Trenton, Paterson and Elizabeth —collectively represent 13 percent of New Jersey's total population. These same Urban centers, during the period 1970 through 1979, accounted for 25 percent of the state's total crime.
- The six centers, from 1970 through 1979, accounted for 53.6 percent of all Violent crime and 21.8 percent of the Nonviolent crimes in the entire state.
- The 14 Urban municipalities represent 20 percent of the state's total population.
- For the period 1970 through 1979, these fourteen Urban municipalities accounted for 33.3 percent of New Jersey's total Index, 61.8 percent of all Violent crime, and 30.7 percent of the state's Nonviolent crime.
- Nearly 7 out of every 10 robberies reported, occurred in the "Urban Fourteen" cities during this ten year period.

The accompanying Table reflects the percent distribution of major Urban and "Urban Fourteen" crime within the state for the years 1970-1979.

Percent Change

During the seventies, New Jersey's Crime Index paralleled the upward trend that was reflected at the national level, recording a 66 percent increase for the years 1970-1979.

Although the crime trends in the "Urban Fourteen" did not increase as rapidly as recorded statewide, the increases however, were quite significant.

- Statewide Crime Index spiraled to a 66 percent increase from 1970 through 1979.
- The "Urban Fourteen" registered a 35 percent increase in the Crime Index from 1970 through 1979.
- The total Crime Index for the six "Major Urban" cities registered a 23 percent increase in this decade.
- The state's Violent crime recorded a 78 percent increase during the decade of the seventies.
- Violent crime in the "Urban Fourteen" increased 58 percent and Nonviolent crime was up 31 percent during this same ten year span.
- Nonviolent crime recorded an increase of 65 percent in New Jersey during this ten year span.
- The Major six Urban cities recorded a 49 percent increase in Violent crime and an 18 percent increase in Nonviolent crime during the seventies.

The accompanying Table reflects percent changes in the state's "Major Urban," and "Urban Fourteen" Crime Index for the years 1970-1979.

STREET CRIME

There has never been a clear-cut definition for "street crime" within the Criminal Justice System. The nation's Clearing House for the collection and dissemination of criminal statistics, the Federal Bureau of Investigation, has no criteria in the categorization of specific crimes to be designated or defined as "street crimes." More and more, this "media term" has often been confused with the Violent Crime group of Murder, Forcible Rape, Robbery, and Aggravated Assault.

Although any particular crime can and does occur on the streets, this analysis, because of reporting constraints within the Uniform Crime Reporting System, is limited to defining street crimes as those offenses which occur, or are most likely to occur, on streets, highways, parking lots, etc. These crimes include highway robbery, purse-snatching, larceny from autos, larceny of auto parts and accessories, larceny of bicycles, and motor vehicle thefts. All are crimes against property and only one, highway robbery, falls in the Violent crime group. Since 1970, these "street crimes" have accounted for 44 percent of New Jersey's total Crime Index, and have risen nearly 60 percent during this ten year survey period.

SUMMARY

- Street crime increased 27 percent between 1970 and 1979.
- Nearly 8 out of every 10 highway robberies occurred in the "Urban Fourteen" during the ten year period.
- Over half of all motor vehicle thefts, during the survey span, occurred in the "Urban Fourteen."
- Fifty-five percent of all purse snatching was perpetrated in the "Urban Fourteen."

The accompanying Table reflects percent distribution of street crime for the "Urban Fourteen" for the years 1970-1979.

SECTION VIII

NEW JERSEY
POLICE EMPLOYEE DATA

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program of New Jersey incorporates the collection of pertinent data relating to the police of the state. Information regarding police employee strength, and distribution are discussed in this Section.

Individual listings of full-time state, county, university and college police departments are shown in tables following the narrative portion of this Section. Listings of municipal police departments will be found in the section entitled "New Jersey Demographic Section."

The determination of police strength for any given area or municipality should be a subject for serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. For example, the increased need for police service in a municipality which has a highly mobile or seasonal population, differs from a municipality which has a relatively stable population. Some other factors, discussed elsewhere in this publication, relate to size, density of population, geographic location, character, and proximity to metropolitan areas. The Tables and Charts shown in this Section should not be interpreted as recommended strength for any given municipality.

TOTAL POLICE EMPLOYEES

Total police employees are defined as the total number of full-time police officers and civilian police employees (clerks, dispatchers, mechanics, etc.) employed by all law enforcement agencies in the state.

1979 Summary Analysis

VOLUME

- During 1979, there were 32,937 police employees employed full-time by police agencies in New Jersey. This represents a 5 percent decrease over 1978.
- Seventy-six percent or 25,097 were sworn officers. The 7,840 civilian employees accounted for the remaining 24 percent.

Year	Total Police Officers	Total Civilians	Total Police Employees
1978	25,262	9,557	34,819
1979	25,097	7,840	32,937
Percent Change	– 1%	– 18%	– 5%

MUNICIPAL POLICE EMPLOYEES

The number of police employees, including civilian personnel, employed full-time by municipalities of the state.

1979 Summary Analysis

VOLUME/RATE

- During 1979, 19,816 municipal police employees were employed full-time, a one percent decrease when compared with 1978.
- There were 2.7 municipal police employees for every 1,000 inhabitants of the state.

TREND

Year	Number of Police Employees	Rate per 1,000 Inhabitants
1978	19,991	2.7
1979	19,816	2.7
Percent Change	– 1%	—

- Atlantic County recorded the largest increase in police employees, up 12 percent from the 730 reported in 1978, to 817 in 1979.
- Essex County decreased more than 9 percent during the year, from 3,237 employees, to 2,931 police employees in 1979.
- Atlantic County recorded the highest police employee rate, 4.3 per 1,000 inhabitants. This relatively high rate is caused by the large influx of summer seasonal residents, which are not included in the year-round population estimates.
- Hunterdon County (1.2), Warren County (1.5), and Sussex County (1.4), located in the rural northwest portion of the state, recorded the lowest police employee rates.

MUNICIPAL CIVILIAN POLICE EMPLOYEES

The personnel of each department differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. This current trend in employing civilians in police departments to perform clerical duties, is in line with the thinking of many police administrators who recommend the use of civilians in this capacity, thus freeing the sworn personnel for actual police related services.

1979 Summary Analysis

VOLUME

- There were 2,709 civilian police employees in 1979, resulting in a decrease of less than one percent as compared to 1978.
- Fourteen percent of all municipal police employees were civilians.

TREND

Year	Number of Civilian Police Employees	Percent Distribution
1978	2,729	13.7
1979	2,709	13.7
Percent Change	– 1%	—

MUNICIPAL POLICE OFFICERS

The number of sworn police officers employed full-time by municipalities of the state.

1979 Summary Analysis

VOLUME/RATE

- There were 17,107 full-time municipal police officers reported in 1979, a decrease of one percent over the 17,262 in 1978.
- The number of full-time municipal police officers for each 1,000 persons in the state was recorded at 2.3; no change since 1974.
- Eighty-six percent of all municipal police employees were sworn officers.

TREND

Year	Number of Police Officers	Percent Distribution	Rate per 1,000 Inhabitants
1978	17,262	86.3	2.3
1979	17,107	86.3	2.3
Percent Change	– 1%	—	—

- The largest numerical increase was reported in Hudson County; up 81 sworn officers.
- Essex County reported the largest decrease of police officers, down 274 sworn officers.
- Counties reporting the highest rate of full-time municipal police officers per 1,000 inhabitants during 1979 were: Atlantic and Cape May 3.4, and Hudson 3.5.
- The smallest number per 1,000 inhabitants were found in Hunterdon, 1.1, Sussex and Warren 1.2, and Burlington 1.3.

The police employee rates per 1,000 population presented here should not be construed as being recommended ratios. The determination of police strength for any municipality should be based on the numerous factors which create the need for police services. These factors, as crime, vary in type and degree from place to place. Some examples are: seasonal populations, geographic location, density and composition of the population.

COUNTY POLICE, SHERIFFS, AND PROSECUTORS

The functions of county law enforcement officers vary widely throughout the state. The operation of one sheriff's department may be limited exclusively to civil areas and the administration of the county jail, or they may be actively involved in criminal matters throughout the county. County police departments are varied in their activities as well, in that some are responsible for enforcement throughout the county, while others may have as their primary mission the policing of county parklands. The responsibilities of county prosecutor's officers include criminal investigations, trial preparation, court presentation and special probes. Because of the difference in the types of police service rendered, rates for county law enforcement agencies are not presented here.

1979 Summary Analysis

VOLUME

- The various county law enforcement agencies reported a total of 5,230 full-time police employees for 1979, a 2 percent increase over 1978.
- There were 3,800 sworn full-time police officers employed by county agencies, 73 percent of the total county police employees.
- Full-time civilian employees were reported at 1,430; 27 percent of the total county police employees.

TREND

Year	Number of Police Officers	Number of Civilian Employees	Total Police Employees
1978	3,760	1,360	5,120
1979	3,800	1,430	5,230
Percent Change	+1%	+5%	+2%

STATE POLICE

The New Jersey State Police is empowered to provide all phases of law enforcement throughout the state. It also renders, upon request, police services, to all the law enforcement agencies in the state. No rates are used due to the variations in the nature and extent of the police services performed by the State Police.

1979 Summary Analysis

VOLUME

- The New Jersey State Police reported a total of 3,075 full-time police employees during the year, a 16 percent increase over 1978.
- There were 2,173 sworn police officers employed during 1979; 71 percent of the total state police employees.
- Twenty-nine percent, or 902 employees were civilian personnel.

TREND

Year	Number of Police Officers	Number of Civilian Employees	Total Police Employees
1978	1,781	875	2,656
1979	2,173	902	3,075
Percent Change	+22%	+3%	+16%

OTHER POLICE (State Agencies)

In addition to the State Police, there were eight other state agencies reporting to the System. No rates were computed due to the variations, in the types of police service rendered, and their statewide jurisdictions.

VOLUME

- Together these agencies reported a total of 4,816 full-time police employees, a decrease of one percent over 1978.
- Fifty-eight percent or 2,799 were civilian employees, while the remaining 42 percent, or 2,017 were sworn personnel.

TREND

Year	Number of Police Officers	Number of Civilian Employees	Total Police Employees
1978	2,191	2,654	4,845
1979	2,017	2,799	4,816

SECTION IX

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULT SUMMARY 1979

POLICE KILLED AND ASSAULTED

The killing or assault of a police officer has a deleterious effect on society that reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well-being of the community and a serious breach of the internal security of the country. Today a young man who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he is sworn to protect. This deplorable situation should be a subject of serious public concern, for in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following information.

POLICE FELONIOUSLY KILLED

1979 Summary Analysis

VOLUME

- During 1979, five New Jersey police officers lost their lives as a result of a criminal action directed against them.
- All five officers were killed by the use of firearms.
- New Jersey law enforcement agencies cleared all five of the killings that occurred in calendar year 1979.
- This is the second time five officers have been killed during a one year period since the statewide collection of crime statistics began in 1967.
- Since 1967, the initial year of collecting uniform crime reporting statistics, thirty-three police officers have been feloniously killed in the line of duty.
- On January 7, 1979, a sheriff's officer with the Bergen County Sheriff's Department was killed with his own weapon, a 38 calibre handgun. While guarding a prisoner at a hospital, the prisoner attempted to escape. During the ensuing struggle, the prisoner wrestled the handgun from the officer and killed him.
- On April 3, 1979, a Sergeant with the Moorestown Township Police Department was wounded with a 38 calibre handgun. Offenders had committed an armed robbery in a neighboring municipality, and during subsequent police chase, were involved in a motor vehicle accident. When the Sergeant arrived on the scene, he was shot and gravely wounded. The officer died June 1, 1979.
- On August 4, 1979, a Patrolman with Essex County Police Department was killed with a 9 millimeter handgun. Offenders had just committed an armed robbery and were stopped for a motor vehicle violation. The Patrolman was unaware the offenders had just committed the armed robbery; offender walked back to the patrol car and killed the Patrolman.
- On October 1, 1979, a sheriff's officer with the Essex County Sheriff's Department was killed with a 38 calibre handgun. The officer was shot and killed while attempting to thwart the armed robbery of a liquor store in South Orange, New Jersey.
- On December 14, 1979, a Patrolman with Hillside Township Police Department was killed with a 38 calibre handgun. Offenders entered a local fast-food restaurant where the Patrolman was assigned a security detail within the establishment. The assailant, prior to the attempted robbery, walked directly over to the officer and shot and killed him.

POLICE OFFICERS ACCIDENTALLY KILLED

1979 Summary Analysis

- During 1979, two New Jersey Police Officers lost their lives accidentally while in the performance of their duty.
- On September 6, 1979, a police officer with the Woodbridge Township Police Department lost his life while attempting to rescue two youths who had been swept into a storm drain during a flash flood condition.
- On December 8, 1979, a Police Officer with the Trenton City Police Department was struck and killed by a motor vehicle while assisting a disabled motorist.

ASSAULTS ON POLICE OFFICERS

Police assault statistics are important to the police administrator who attempts to identify the causative factors of this type of criminal activity. Many factors contribute to police assaults, and circumstances vary from place to place, it is therefore extremely difficult to identify specific reasons for these assaults. The following information illustrates the frequency of these events, and any attempt at analysis of these assaults should include consideration of the unique variables present in each jurisdiction.

1979 Summary Analysis

VOLUME

- There were 4,316 police officers assaulted in New Jersey during the year 1979, less than one percent decrease over the previous year.
- This figure reflects the first decrease in police assaults since the statewide collection of crime statistics began in 1967.

TREND

Year	Total Number of Police Officers Assaulted
1978	4,325
1979	4,316
Percent Change	—

- No assault rates are computed for total police officers assaulted, because of the broad field of services performed by many state and county police agencies.

ASSAULTS ON MUNICIPAL POLICE OFFICERS

1979 Summary Analysis

VOLUME/RATE

- There were 4,085 municipal police officers assaulted, an increase of less than one percent.
- Twenty-nine percent, or 1,198 officers sustained physical injury to one degree or another.
- The assault rate for every 100 municipal police officers, reached 23.9 assaults; an increase of one percent when compared to 1978.

TREND

Year	Municipal Police Officers Assaulted	Rate per 100 Population
1978	4,074	23.6
1979	4,085	23.9

OTHER POLICE OFFICERS ASSAULTED

The following state and county law enforcement agencies are dealt with separately, and are not included when computing municipal assault rates. The services performed by these agencies vary greatly from the functions of municipal police agencies, and therefore should be considered within the municipal grouping.

1979 Summary Analysis

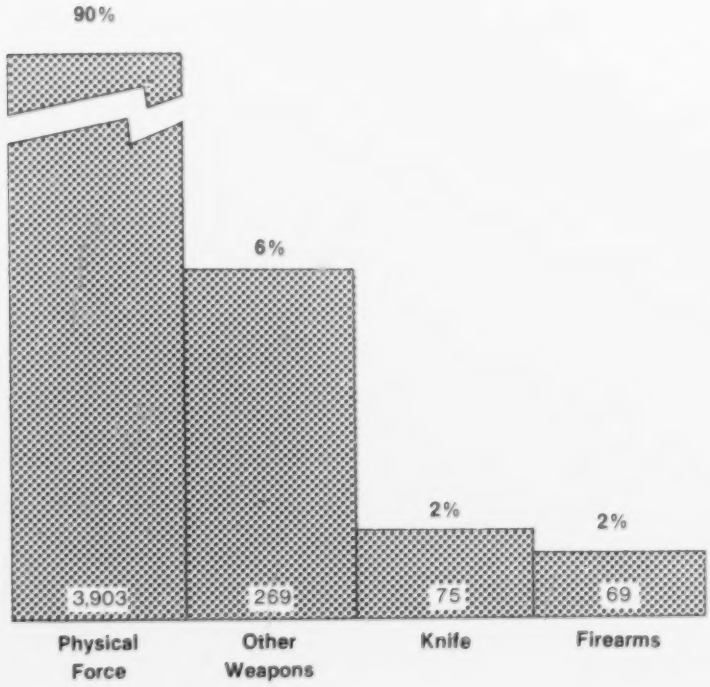
VOLUME

- County law enforcement agencies reported 110 officers assaulted, of these 54 sustained physical injury.
- The New Jersey State Police reported 85 troopers assaulted, 18 of whom were injured.
- Other state agencies with police powers, reported a total of 36 officers assaulted and 29 sustained injury.

WEAPONS USED

- Personal weapons, such as hands, fist and feet were used in over 90 percent of all police assaults.

1979
WEAPONS USED IN ASSAULTS ON POLICE OFFICERS
Total Police Assaults — 4,316

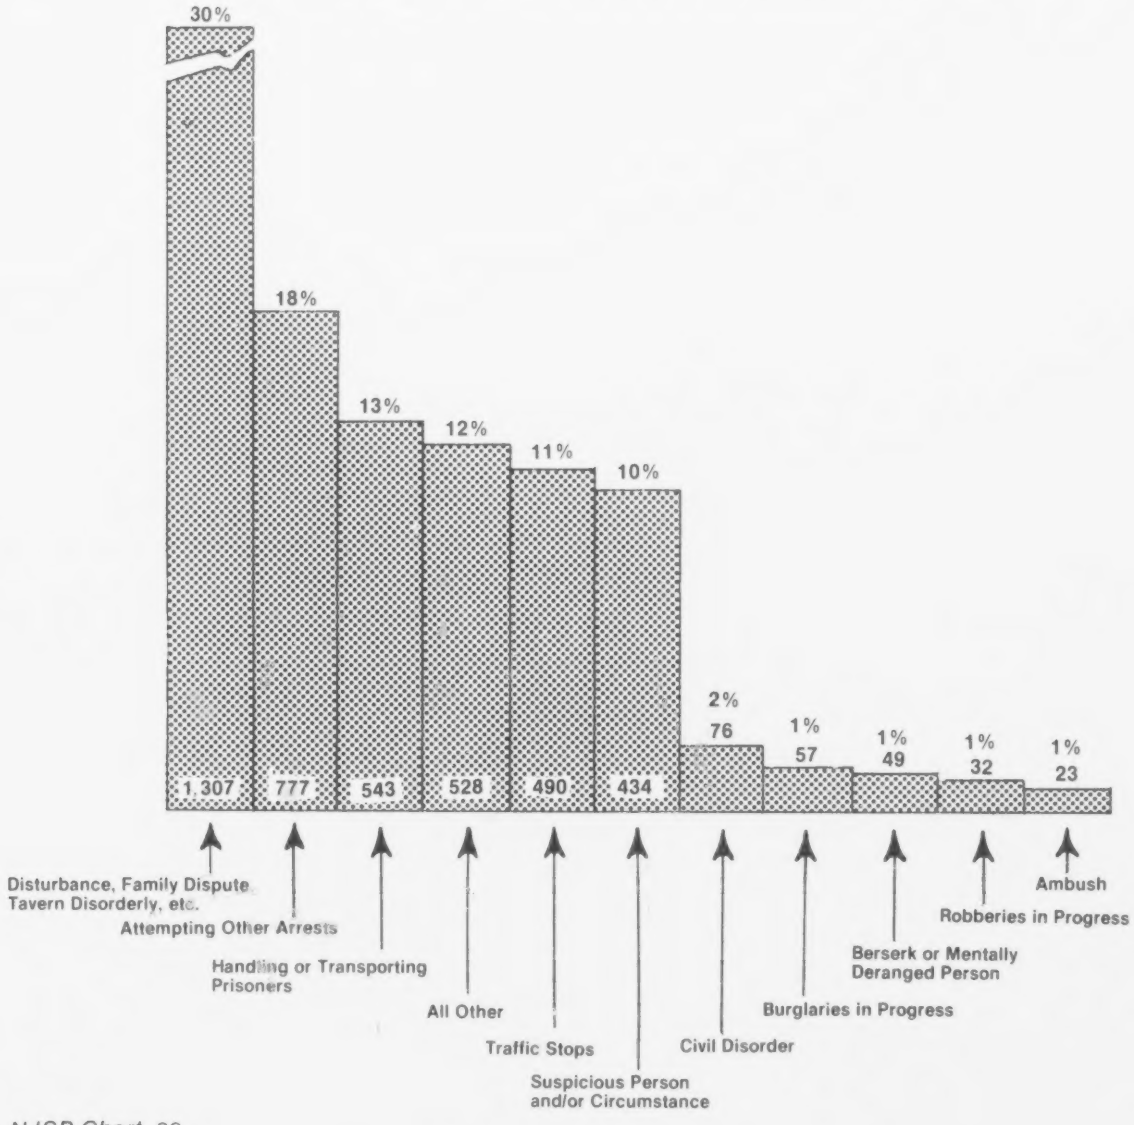


NJSP Chart 27

TYPE OF ACTIVITY

- Thirty percent of police assaults occurred when officers were responding to disturbance calls.
- Officers attempting other arrests accounted for 18 percent of the police assaults.

POLICE ASSAULTED BY TYPE OF ACTIVITY — 1979



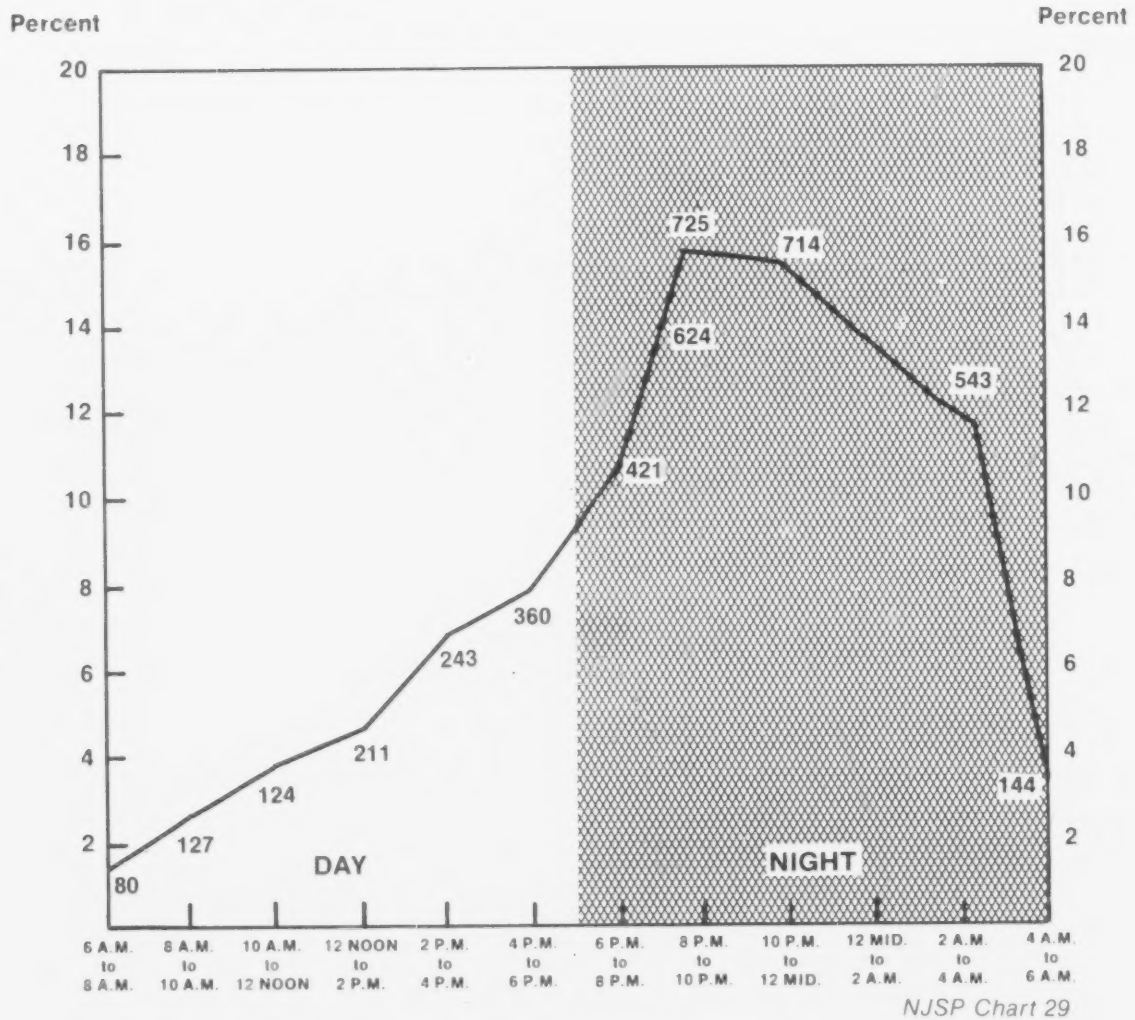
NJSP Chart 28

TIME OF POLICE ASSAULTS

- The four hour period of 8:00 p.m. to Midnight accounted for over 31 percent of the assaults on police officers.
- Over 60 percent of the police assaults occurred during the eight hour period between 8:00 p.m. to 4:00 a.m.

ASSAULTS ON POLICE OFFICERS BY HOUR OF DAY

NUMBER - PERCENT DISTRIBUTION



NJSP Chart 29

ARRESTS/CLEARANCES

- The police of New Jersey were successful in clearing by arrest, 98 percent of the assaults directed at them.
- Thirty-two percent of those arrested for police assaults were charged with an indictable offense and the remainder were charged with the lesser non-indictable offense.
- Juveniles accounted for 12 percent of those arrested for assaults on police officers.

POLICE OFFICER ASSAULTED SCENARIO

A municipal Police Officer is assaulted by an individual using physical force between the hours of 8:00 p.m. and 4:00 a.m.; the officer is answering a disturbance call and the offender will be arrested in 98 percent of the cases.

GLOSSARY OF TERMS

ADULT	For Uniform Crime Reporting purposes, a person aged 18 or over.
ALL OTHER RACE	For UCR purposes, applies to Filipinos, Hawaiians, Eskimos, Aleuts, Koreans, Asian Indians and Malayans.
ARREST RATE	The number of arrests reported for Part I and Part II offenses for each unit of population, generally per 1,000. Arrest rates are computed in the same manner as crime rates.
CLEARANCE	For UCR purposes, the solution to a particular crime, usually by the arrest of the offender.
CLEARED BY ARREST	For UCR purposes, an offense is cleared when the offender has been identified, sufficient evidence has been obtained to formally charge and the offender has been ordered to appear in court.
CRIME INDEX	The sum total of seven major offenses used to measure the extent, fluctuation and distribution of crime in a geographical area. The following crimes make up the Index: Murder, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, and Motor Vehicle Theft. These offenses are referred to as Index offenses.
CRIME RATE	The number of Index offenses reported for each unit of population, per 1,000. Crime rates are computed by dividing the number of Index offenses by the population of the community and multiplying the answer by 1,000. Example: 500 Index offenses divided by 10,000 population × 1,000 = 50.0 Crime Rate.
CRIMES AGAINST PERSONS	Consists of the following Index offenses: Murder, Forcible Rape, and Aggravated Assault.
CRIME AGAINST PROPERTY	Consists of the following Index offenses: Robbery, Burglary, Larceny-Theft, and Motor Vehicle Theft.
DAY	For UCR purposes, the hours from 6 A.M. to 6 P.M.
EXCEPTIONAL CLEARANCE	For UCR purposes, an offense is cleared in this manner when an offender has been identified, located and sufficient evidence to charge has been obtained but there is some reason beyond police control which prohibits the offender from being brought before the court.
FELONY MURDERS	Those killings which are perpetrated during the commission of another crime. They are classified as Rapes, Robberies, Sex Offenses, Aggravated Assault, Arson, and other felonious activities.
HIERARCHY RULE	For UCR purposes, each crime or attempted crime is counted in only one offense category. If several offenses are committed, simply glance down the list of Part I offenses and stop at the first offense you recognize from the facts given. This offense is the correct classification for this criminal activity.
INDIAN RACE	For UCR purposes, applies to the American Indian.
JUVENILE	For UCR purposes, a person under the age of 18.

JUVENILE CLEARANCE	Those crimes where the offenders are identified as juveniles.
NIGHT	For UCR purposes, the hours from 6 P.M. to 6 A.M.
NONVIOLENT CRIME	Consists of the following Index offenses: Burglary, Larceny-Theft, and Motor Vehicle Theft.
OTHER DANGEROUS WEAPON	For UCR, includes assaults resulting from the use of any object or thing as a weapon which does or could result in serious injury.
PART I OFFENSES	The first of two main categories of crime classes composing a Universal Crime Classification System established for crime reporting purposes. Murder, Manslaughter, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, and Motor Vehicle Theft, make up the Part I offenses. These crimes are by their very nature more serious and/or occur more frequently. The monthly tabulation of Part I offenses provides a count of "offenses known."
PART II OFFENSES	The second of two main categories of crime classes composing a Universal Crime Classification System established for crime reporting purposes. Part II offenses are generally less serious in nature.
VIOLENT CRIME	Consists of the following Index offenses: Murder, Forcible Rape, Robbery, and Aggravated Assault.
